

RESIN INJECTION MOLDED ARTICLE WITH REINFORCING OR
DECORATIVE CORE

5

ABSTRACT OF THE DISCLOSURE

10 A resin injection molded article comprising at least
a two-dimensional reinforcing core material formed into a
non-planar shape, a resin surface layer covering the
surface of the core material, and a resin-made structural
member formed integrally with the resin surface layer and
15 protruding from the resin surface layer, wherein the
resin surface layer and the structural member are
integrally molded by injection molding. The two-
dimensional core material may be used as a design.
